| The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply | | | | | | | | |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). | | | | | | | | |
| Status | | | | | | | | |

Application/Control Number: 10/724,450

Art Unit: 2873

1. The Terminal Disclaimer filed on 8/13/04 is improper. The U.S. Patent No. 6,540,248 cited in the Terminal Disclaimer is in error, the corrected U.S. Patent No is 6,540,348. The new Terminal Disclaimer is required.

Double Patenting Rejection

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are rejected under the judicially created doctrine of obviousnesstype double patenting as being unpatentable over claims 1-20 of U.S. Patent No. Application/Control Number: 10/724,450 Page 3

Art Unit: 2873

6.540.348. Although the conflicting claims are not identical, they are not patentably distinct from each other because both patent and this application are claiming the primary spectacle frame comprising a frame body for mounting a pair of lenses in position, wherein said frame body comprises a primary bridge connected between said two lenses, two nose supports extended from two inner sides of said lenses respectively, and two side extensions provided at two outer sides of said lenses for coupling a pair of temples respectively; each of said nose supports comprising a supporting member and an extension arm, having magnetic attraction ability, which has a distal end portion extended from said supporting member and a root end portion extended from said inner side of said respective lens; and said detachable shelter frame comprising a shelter frame for supporting two auxiliary lenses and a pair of magnetic attachment arrangements connected to said shelter frame, wherein each of said magnetic attachment arrangements comprises a supporting arm extending rearwardly from an inner side of said shelter frame towards said respective extension arm and a magnetic seat which is connected to said supporting arm and extended to magnetically attach' said respective extension arm of said primary spectacle frame so as to securely hold said shelter frame in front of said primary spectacle frame.

3. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-40 of U.S. Patent No. 6,783,233. Although the conflicting claims are not identical, they are not patentably distinct from each other because both patent and this application are claiming

Application/Control Number: 10/724,450

Art Unit: 2873

the primary spectacle frame comprising a frame body for mounting a pair of lenses in position, wherein said frame body comprises a primary bridge connected between said two lenses, two nose supports extended from two inner sides of said lenses respectively, and two side extensions provided at two outer sides of said lenses for coupling a pair of temples respectively; each of said nose supports comprising a supporting member and an extension arm, having magnetic attraction ability, which has a distal end portion extended from said supporting member and a root end portion extended from said inner side of said respective lens; and said detachable shelter frame comprising a shelter frame for supporting two auxiliary lenses and a pair of magnetic attachment arrangements connected to said shelter frame, wherein each of said magnetic attachment arrangements comprises a supporting arm extending rearwardly from an inner side of said shelter frame towards said respective extension arm and a magnetic seat which is connected to said supporting arm and extended to magnetically attach' said respective extension arm of said primary spectacle frame so as to securely hold said shelter frame in front of said primary spectacle frame.

Page 4

4. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,761,449. Although the conflicting claims are not identical, they are not patentably distinct from each other because both patent and this application are claiming the primary spectacle frame comprising a frame body for mounting a pair of lenses in position, wherein said frame body comprises a primary bridge connected between said

Application/Control Number: 10/724,450 Page 5

Art Unit: 2873

two lenses, two nose supports extended from two inner sides of said lenses respectively, and two side extensions provided at two outer sides of said lenses for coupling a pair of temples respectively; each of said nose supports comprising a supporting member and an extension arm, having magnetic attraction ability, which has a distal end portion extended from said supporting member and a root end portion extended from said inner side of said respective lens; and said detachable shelter frame comprising a shelter frame for supporting two auxiliary lenses and a pair of magnetic attachment arrangements connected to said shelter frame, wherein each of said magnetic attachment arrangements comprises a supporting arm extending rearwardly from an inner side of said shelter frame towards said respective extension arm and a magnetic seat which is connected to said supporting arm and extended to magnetically attach' said respective extension arm of said primary spectacle frame so as to securely hold said shelter frame in front of said primary spectacle frame.

5. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,729,723. Although the conflicting claims are not identical, they are not patentably distinct from each other because both patent and this application are claiming the primary spectacle frame comprising a frame body for mounting a pair of lenses in position, wherein said frame body comprises a primary bridge connected between said two lenses, two nose supports extended from two inner sides of said lenses respectively, and two side extensions provided at two outer sides of said lenses for

Application/Control Number: 10/724,450 Page 6

Art Unit: 2873

coupling a pair of temples respectively; each of said nose supports comprising a supporting member and an extension arm, having magnetic attraction ability, which has a distal end portion extended from said supporting member and a root end portion extended from said inner side of said respective lens; and said detachable shelter frame comprising a shelter frame for supporting two auxiliary lenses and a pair of magnetic attachment arrangements connected to said shelter frame, wherein each of said magnetic attachment arrangements comprises a supporting arm extending rearwardly from an inner side of said shelter frame towards said respective extension arm and a magnetic seat which is connected to said supporting arm and extended to magnetically attach' said respective extension arm of said primary spectacle frame so as to securely hold said shelter frame in front of said primary spectacle frame.

6. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,382,787. Although the conflicting claims are not identical, they are not patentably distinct from each other because both patent and this application are claiming the primary spectacle frame comprising a frame body for mounting a pair of lenses in position, wherein said frame body comprises a primary bridge connected between said two lenses, two nose supports extended from two inner sides of said lenses respectively, and two side extensions provided at two outer sides of said lenses for coupling a pair of temples respectively; each of said nose supports comprising a supporting member and an extension arm, having magnetic attraction ability, which has

Page 7

Application/Control Number: 10/724,450

Art Unit: 2873

a distal end portion extended from said supporting member and a root end portion extended from said inner side of said respective lens; and said detachable shelter frame comprising a shelter frame for supporting two auxiliary lenses and a pair of magnetic attachment arrangements connected to said shelter frame, wherein each of said magnetic attachment arrangements comprises a supporting arm extending rearwardly from an inner side of said shelter frame towards said respective extension arm and a magnetic seat which is connected to said supporting arm and extended to magnetically attach' said respective extension arm of said primary spectacle frame so as to securely hold said shelter frame in front of said primary spectacle frame.

Provisional Rejection, Obviousness Type Double Patenting

7. Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/648,126. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications are claiming the primary spectacle frame comprising a frame body for mounting a pair of lenses in position, wherein said frame body comprises a primary bridge connected between said two lenses, two nose supports extended from two inner sides of said lenses respectively, and two side extensions provided at two outer sides of said lenses for coupling a pair of temples respectively; each of said nose supports comprising a supporting member and an extension arm, having magnetic attraction ability, which has a distal end portion extended from said supporting member and a root end portion

Art Unit: 2873

extended from said inner side of said respective lens; and said detachable shelter frame comprising a shelter frame for supporting two auxiliary lenses and a pair of magnetic attachment arrangements connected to said shelter frame, wherein each of said magnetic attachment arrangements comprises a supporting arm extending rearwardly from an inner side of said shelter frame towards said respective extension arm and a magnetic seat which is connected to said supporting arm and extended to magnetically attach' said respective extension arm of said primary spectacle frame so as to securely hold said shelter frame in front of said primary spectacle frame...

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Any inquiry concerning this communication should be directed to Examiner Dang 8. at telephone number (571) 272-2326.
